## **DETAILED ACTION**

### ***Election/Restrictions***

1. A species election is required under 35 U.S.C. 121 and 372. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single disclosed species.
2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1. The species are as follows:
  - Therapeutic ingredient (e.g. growth factor, antibacterial agent, pain-relieving agent, enzymatic agent) (claims 2-8)
3. The claims are deemed to correspond to the species as set forth above. The following claims are generic: 1, 9, and 10.
4. These species do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: growth factors, antibacterial agents, pain relieving agents, and enzymatic agents are all known in the prior art. Furthermore, the species are independent or distinct because as disclosed the different species have mutually exclusive characteristics for each identified species. Specifically, each of these types of agents represents a separate category of therapeutic agent with unique properties. For instance antibacterial agents may be small molecules (e.g. penicillin) that are not pain relievers, growth factors, or enzymes. Similar reasoning holds for each

of these species. In addition, these species are not obvious variants of each other based on the current record. Because these species cannot be considered novel in the art and are distinct for the reasons presented above, they do not share a common special technical feature and are subject to the election requirement.

5. Applicant is required, in reply to this action, under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. **Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. The election of a species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly

and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin S. Orwig whose telephone number is (571)270-5869.
